PROJECTS

- Enterprise Learning Management System

2025

Next.js, Node.js, AWS, Docker

– Built a full-stack LMS with course management, video streaming, and user dashboards.

– Integrated Clerk for authentication and Stripe for payment processing.

– Deployed backend on AWS and frontend on Vercel using Docker for containerization.
- Content Genie

2025

Next.js, TypeScript, PostgreSQL, Google Gemini API

– Built an AI-powered web app to generate dynamic content using Google Gemini API.

– Implemented a credit-based payment system and user authentication with Clerk.

– Used PostgreSQL with Drizzle ORM for data storage and Tailwind CSS for UI.
- Socioscrape : Social Media Forensic Analysis Platform - SIH 2024

2024

HTML, CSS, JavaScript, MySQL, Node.js, Express.js, AI/ML

– Contributed to frontend development and database design for a social media investigation platform for legal and forensic use cases.

– Built interactive dashboards using HTML, CSS, and JavaScript to visualize and analyze social media data.

– Designed and managed the MySQL database schema to efficiently store and retrieve investigation case data.
- Vanvitrak

2025

Next.js, Express.js, MongoDB, Python

– Built an AI-powered land records verification system integrating WebGIS, OCR, and satellite data.

– Developed an MCP-based chatbot providing real-time land records, satellite layers, and scheme eligibility.

– Implemented a blockchain verification workflow: PDF upload, SHA-256 hashing, MongoDB storage, and Solidity smart contract validation.

– Built an AI remote sensing pipeline for mapping land assets and generating accurate FRA claim polygons.
